1. Generating Thumbnail for Single Game

The EGT Digital Resize Tool facilitates the automated generation of game thumbnails with user-specified resolutions, supporting batch processing for individual or multiple game assets.

To generate a thumbnail for a specific game, follow the steps below:

Option 1

- Navigate to Game Library and select a desired game.
- Click or tap the **Generate Thumbnail** button.

- Select the thumbnail size: width between 160px and 1920px, and height between 100px and 1080px

> **NOTE:**
> Additional limitations:
>
> When the width is input, the height must be constrained as follows:
> - Minimum Height = width × 0.323
> - Maximum Height = width × 1.85
>
> When the height is input, the width must be constrained as follows:
> - Minimum Width = height × 0.23
> - Maximum Width = height × 3.11

- Select the placement of the badge - left or right. Option without a badge is also available by choosing "No badge"

Additionally, for Bell Link and Gods & King Link games, the thumbnails can be generated with both normal and VIP JP badge, by choosing the VIP JP badge.

- Once you complete all the required fields, the **Generate** button is activated. Click/ tap on it to generate your thumbnail which is visualized on the right part of the window.

- Select the format of the image (PNG, JPEG or WEBP) and click/tap the **Download Image** button. The thumbnail is downloaded according to the settings of your device.
